Our innovations have played an important part in raising the quality of life for the people throughout the kingdom for over a century. Everyone in Thailand has been touched by Siemens’ products and solutions at some point in their lives.

Markus Lorenzini, President & CEO
Siemens Limited
Our contribution

We make real what matters for Thailand

A critical aspect of Thailand 4.0 is the creation of a knowledge-based economy, with an emphasis on research and development, science and technology, creativity, and innovation. Job creation, human resource development, and skills training are vital towards the achievement of this vision.

Thailand moves to create a high-income economy with focus in the quality people’s lives. This means attention towards education, healthcare, safety and security, and intelligent infrastructure for increased mobility and power needs.

We provide 103 km of public transport tracks to 3 world-class mass transit systems

Thailand intends to develop from a middle-income to a high-income country. Thailand 4.0 program will transform long-term growth through strategic reform and towards a digital economy.

Our contribution

Economic Diversity
We are partners to Thailand’s prosperity by contributing THB 17.4 billion to Thailand’s GVA.

We support 950 local suppliers through our operations.

Infrastructure
Transportation
Delivered 3 world-class mass rapid systems
• BTS Sky Train
• Airport Rail Link
• MRT Blue Line

103 km of public transport tracks with a daily ridership of ~1 million.

Power Generation
In 2017, approximately 30% of Thailand’s electricity is generated with Siemens equipment (9.5 GW incl. backlog).

Industries to remain competitive
Sugar mills at Kasel Thai International PLC increased their productivity, efficiency and capability by 30% with Siemens Integrated Drive System (IDS).

Digitalization
As a leader in Digitalization technologies, Siemens stands to partner with Thailand 4.0 journey.

We support rail education in Thailand by the Siemens Dual Education Program.

Our rail service depot conducted training for over 1,500 BTS personnel and 1,941 MRTA personnel with an anticipated additional 450 personnel to be trained.

Our contribution

950 local suppliers receives technical training from Siemens.

We supply 90 wind turbines for wind farm projects that produce 207 MW of renewable energy. – The first and largest wind farm in ASEAN.

Siemens supplied 9,900 jobs in Thailand

We are committed to work closely with our partners to push the boundaries of the future beyond just innovation and creativity. We aim to create a comfortable and sustainable society. To transform and inspire future generations to come.
