A Smart, Sustainable Technology Vision for a Smart, Sustainable Charlotte

Are you looking for a way to improve air quality and reduce greenhouse gas emissions? Look no further than Siemens and the City of Charlotte, which have partnered to create a model for smart, sustainable cities.

A recent study by Siemens and the City of Charlotte's Sustainability Office looked at the potential impacts of investing in smart technologies. The study found that these technologies could contribute to a smart, sustainable future in Charlotte.

The study estimates that by implementing these technologies, Charlotte could experience:

- A reduction in greenhouse gas emissions of 21% by 2025 and 4.4% by 2050.
- An improvement in air quality of 8% by 2025 and 13.7% by 2050.
- The creation of more than 8,000 jobs by 2025.
- The creation of up to 100,000 jobs by 2050.

With all that’s happening to make Charlotte smart and sustainable, it’s clear: People love Charlotte.

“People don’t care about sustaining something they don’t love.”

With all that’s happening to make Charlotte smart and sustainable, it’s clear: People love Charlotte.
