

Vision 2020+ Shaping the future Siemens

Joe Kaeser, President and CEO
Press and Analyst Conference | Munich, August 2, 2018

Notes and forward-looking statements

This document contains statements related to our future business and financial performance and future events or developments involving Siemens that may constitute forward-looking statements. These statements may be identified by words such as “expect,” “look forward to,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “estimate,” “will,” “project” or words of similar meaning. We may also make forward-looking statements in other reports, in presentations, in material delivered to shareholders and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of Siemens’ management, of which many are beyond Siemens’ control. These are subject to a number of risks, uncertainties and factors, including, but not limited to those described in disclosures, in particular in the chapter Risks in the Annual Report. Should one or more of these risks or uncertainties materialize, or should underlying expectations not occur or assumptions prove incorrect, actual results, performance or achievements of Siemens may (negatively or positively) vary materially from those described explicitly or implicitly in the relevant forward-looking statement. Siemens neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated.

This document includes – in the applicable financial reporting framework not clearly defined – supplemental financial measures that are or may be alternative performance measures (non-GAAP-measures). These supplemental financial measures should not be viewed in isolation or as alternatives to measures of Siemens’ net assets and financial positions or results of operations as presented in accordance with the applicable financial reporting framework in its Consolidated Financial Statements. Other companies that report or describe similarly titled alternative performance measures may calculate them differently.

Due to rounding, numbers presented throughout this and other documents may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

Acquisition mendix

Perfect fit to further expand leadership in IoT & Digital Enterprise

Rationale

Area of growth

- Highly attractive business for low-code development: CAGR >40% until 2022
- Large untapped market potential

Potential profit pool

- Strong margin profile with gross margin ~80% - typical for software companies
- Sustainability of earnings supported by high-value added engineering services and recurring business of > 90%

Why Siemens

- MindSphere integrated with mendix will accelerate ecosystem adoption
- Enables Siemens & customers to rapidly build applications with 50%+ shorter release time

Synergetic value

- Faster expansion of MindSphere through ecosystem adoption and rapid app development
- NPV of > €0.5bn
- Make use of Siemens global scale across industries & leading IoT platform MindSphere

Paradigm shifts

- Clear trend towards cloud enabled applications
- Digitalization of businesses and industries becomes a fundamental necessity
- Transformation from hardware to software driven business will continue
