Disclaimer

This document contains statements related to our future business and financial performance and future events or developments involving Siemens that may constitute forward-looking statements. These statements may be identified by words such as "expect," "look forward to," "anticipate," "intend," "plan," "believe," "seek," "estimate," "will," "project" or words of similar meaning. We may also make forward-looking statements in other reports, in presentations, in material delivered to shareholders and in press releases.

In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of Siemens' management, of which many are beyond Siemens' control. These are subject to a number of risks, uncertainties and factors, including, but not limited to those described in disclosures, in particular in the chapter Risks in the Annual Report.

Should one or more of these risks or uncertainties materialize, or should underlying expectations not occur or assumptions prove incorrect, actual results, performance or achievements of Siemens may (negatively or positively) vary materially from those described explicitly or implicitly in the relevant forward-looking statement.

Siemens neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated.

This document includes – in the applicable financial reporting framework not clearly defined – supplemental financial measures that are or may be alternative performance measures (non-GAAP-measures). These supplemental financial measures should not be viewed in isolation or as alternatives to measures of Siemens' net assets and financial positions or results of operations as presented in accordance with the applicable financial reporting framework in its Consolidated Financial Statements. Other companies that report or describe similarly titled alternative performance measures may calculate them differently.

Due to rounding, numbers presented throughout this and other documents may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

All information is preliminary.

Financial publications are available for download at: www.siemens.com/ir
More than 170 years ago, Siemens was founded on a powerful idea: A company should not only focus on maximizing profits. It should also serve society – with technologies and products, with its employment practices, with everything that it does.

This idea is still alive today. Serving society while doing successful and sustainable business is at the heart of Siemens’s strategy. It’s our company’s ultimate purpose.”

Joe Kaeser
Our purpose

We serve society.
We create value for all stakeholders.
We make real what matters.
171 years of social responsibility
Siemens Innovation

Milestones of a 171-year history

1816 – 1892
Company founder, visionary and inventor

1866
The dynamo makes electricity part of everyday life

1847
Pointer telegraph lays the foundation of Siemens as a global company

1879
World’s first electric railway
1925 Siemens electrifies the Irish Free State with a hydroelectric power plant

1959 SIMATIC makes Siemens a leader in automation technology

1975 Breakthrough of high-voltage direct current (HVDC) transmission

1983 First magnetic resonance imaging scanner goes into operation

2010 TIA Portal takes automation a stage further

2012 Test operation of the world’s largest rotor for offshore wind turbines

2016 MindSphere, the cloud-based operating system for the Internet of Things

2018 Charter of Trust: a joint initiative for a secure digital world

2019 Start of first project for Siemensstadt 2.0
Since its founding, Siemens shapes industrial revolutions

- **Industrie 4.0**
  - Digitalization – Cyberphysical systems

- **Industrie 3.0**
  - Electronics and IT – Automation of manufacturing

- **Industrie 2.0**
  - Electricity – Introduction of assembly line

- **Industrie 1.0**
  - Founding of Siemens
  - Steam power – Shift from manual to mechanical production

Countries with active Siemens operations
Our contribution to society

Employment

4.3 million jobs supported through our contributions

2.2 million thereof in developing countries
Megatrends that are changing our world

Urbanization

By 2050, nearly 68 percent of the world population will live in cities; today it's 55 percent.

The population of cities worldwide is growing at a rate of about 50 million people per year. Accordingly, investments in urban infrastructure are booming.

50 million people are transported daily with the help of intelligent Siemens rail systems.

> €2 bn cost savings in 7,400 buildings through energy savings contracting.

#1 in Digital Grid business to intelligently connect decentralized energy systems.
Megatrends that are changing our world

Demographic change

By 2050, the world population will grow from 7.6 billion today to 9.8 billion.

The average life expectancy will be 77 years in 2050; today it's 72 years.

Our contribution to society

Healthcare and education

~240,000 patients around the world get in touch with products from Siemens Healthineers every hour

1 million students in over 70 countries have been reached via “GO PLM”

Siemens
Megatrends that are changing our world

Climate change

At the UN Climate Conference in Paris in 2015, almost all nations of the world agreed to limit anthropogenic global warming to well under 2\degree centigrade. In the summer of 2017, earth's atmosphere had the highest concentration of carbon dioxide in 800,000 years.

Source: Earth System Research Laboratory, NOAA, October 5, 2017
Our contribution to society

Environmental protection

609 million metric tons of CO₂-emissions were curbed for customers with our environmental portfolio in FY 2018

-33% CO₂-emissions since 2014

2030 goal: Siemens will be carbon neutral
Megatrends that are changing our world

Digitalization

By 2025, the global volume of data will soar to 163 zettabytes.

By 2020, 30 billion devices will be connected.

Source: EY report on IDC, Internet of Things: Human-machine interactions that unlock possibilities, 2016; Cave, Ande, What Will We Do When The World's Data Hits 163 Zettabytes In 2025?, April 2017; (both studies based on MacGillivray, Carrie, Worldwide Internet of Things Forecast Update, 2015-2019, International Data Corporation (IDC), February 2016.)

Siemens and the future of work
Employer with a vision

379,000 people work for Siemens worldwide

~41,000 new hires worldwide

~4,700 new hires in Germany

10,900 apprentices and students in work-study programs worldwide

As of September 30, 2018; continuing operations
Employer with a vision

Training and education

Siemens invests about €514 million each year in the training and education of employees.

With approximately 10,900 apprentices and students in dual study programs worldwide, Siemens is one of the world’s largest and most innovative private training companies.

Until the end of fiscal 2022, Siemens will provide up to €100 million for qualification projects in Germany. This Fund for the Future is a key element with which Siemens is shaping the structural transformation.
Employer with a vision

Zero Harm Culture

Our program "Zero Harm Culture@Siemens" follows three principles:

The first is the strong belief that zero incidents is achievable.

The second is that there’s never a reason to compromise on health and safety.

The third is “We take care of each other”.

Our employees are our greatest asset. It is why we want every single Siemens employee to be able to rely on a safe working environment at all times.

Gas and Power

Leading the energy transformation.

Gas and Power is a global pacesetter in energy, helping customers to meet the evolving demands of industries and societies. The energy industry is challenged to shift towards a carbon-neutral future, manage the complexity of decentralized energy systems, and adopt new digital technologies to maintain the competitiveness of its assets.

As the leading innovator for the energy systems of today and tomorrow Gas and Power comprises broad competencies across the entire energy value chain and offers a uniquely comprehensive portfolio for utilities, independent power producers, transmission system operators and the oil and gas industry.

On May 7th, Siemens announced its plans to give Gas and Power complete independence and entrepreneurial freedom through a carveout and a subsequent public listing (spinoff). In addition, Siemens plans to contribute its majority stake in the market-leading renewable energies company SGRE – currently 59 percent – to GP.
Operating Companies

Gas and Power

65,000 Employees

€18.13 bn Revenue

4.0% Adjusted EBITA margin

As of September 30, 2018, on a comparable basis.

CEO  Lisa Davis
COO  Tim Holt
CFO  Michael Becker
HQ  Houston, USA
The advancing digitalization, in tandem with the increasing flexibilization of production processes, provides new opportunities and choices for industrial companies all across the globe. Digital Industries supports our customers in unlocking the full potential: as a partner providing cutting-edge technologies for the automation and digitalization of the discrete and process industries.

The Digital Enterprise portfolio is at the core of our offer. It provides companies of all sizes with the right products, along with consistent solutions and services for the integration and digitalization of the entire value chain. As an innovation leader, we think ahead to the next level of digital transformation – and integrate cutting-edge technologies such as artificial intelligence, edge computing, industrial 5G, autonomous handling systems, blockchain and additive manufacturing into our portfolio.
Operating Companies

Digital Industries

75,000 Employees

€15.59 bn Revenue

18.6% Adjusted EBITA margin

As of September 30, 2018, on a comparable basis.
Smart Infrastructure

Smart grids + smart buildings = smart infrastructure.

Smart Infrastructure brings together energy systems – from the intelligent control across the grid to medium-voltage distribution system, through a broad range of low-voltage and control products, to the point of consumption – with Siemens' broad portfolio of building technologies. We support utilities, building customers and industries with a wide range of applications.

At the point of connection between the grid and buildings – at the grid edge – there are exciting nascent markets including prosumption, electric vehicle infrastructure, energy storage and microgrids.

We will combine physical solutions and digitalization across the focus areas of electrification and automation.

Global Business Services

Global Business Services (GBS) innovates, designs, transforms and efficiently operates business services for Siemens units and external customers. The service offering includes digital end-to-end process solutions as well as expertise-driven services like sales and marketing support or project and transformation management.

With unique expertise and more than 20 years of experience in business services, GBS creates valuable impact specific to customers' needs. GBS realizes scale economies and provides flexibility by bundling services and balancing efficiency and customer proximity requirements in a global delivery network. With the implementation of technologies such as Business Process Management, Robotic Process Automation, Artificial Intelligence or Data Analytics, GBS drives business process automation and the digital transformation.
Real Estate Services

Real Estate (SRE) offers solutions from strategy to the operation of office, industrial and specialized property spaces.

For Siemens and also for external customers, SRE leverages value creation and efficiency from real estate and acts as a trusted, customer-oriented business partner.

With 25 years of experience in corporate real estate management, SRE drives digitization in corporate real estate and increases the flexibility of companies with the help of smart and sustainable offices and factories.
IoT Services

IoT Services is the partner of choice for a holistic, successful and sustainable digital transformation. The unmatched industries DNA, paired with state of the art IoT know-how creates a key benefit for realizing their own digital strategy.

From consulting to design & prototyping of IoT solutions to implementing those into existing IT systems and business processes: customers can get everything from a single source – hence we deliver IoT solutions that are as unique as an individual fingerprint.
Next47 powered by Siemens

Next47 is an independent, global venture firm backed by Siemens AG. We combine capital with hands-on business development capabilities that help our portfolio companies grow revenue through the Siemens ecosystem. Next47 works with start-ups that use deep and frontier technologies such as artificial intelligence, augmented and virtual reality, cybersecurity, autonomous driving, IoT, robotics, and advanced manufacturing to solve the most difficult and fundamental industry challenges facing Siemens and Siemens customers.

Next47 is also an enabler of “intrapreneurialism” within Siemens. The Next47 Accelerator, a program built in partnership with Alchemist, aims to identify and nurture big, breakthrough ideas within Siemens with the goal of empowering internal talent to create new business opportunities for the company.
Corporate Development

Portfolio Companies

Under the umbrella of the Portfolio Companies, Siemens has bundled several units which operate independently since April 1, 2019. The nine Portfolio Companies employ around 22,500 people. In fiscal year 2018 they generated about €5 billion in revenue. The units operate agile and flexible: decentralized, with fast decision making and reaction times. This enables them to be more competitive in their respective markets with more focus on their customers. The Portfolio Companies are led by Chairman Jochen Eickholt.
300,000 Siemens employees are already shareholders of the company
