## Siemens awarded wind turbine order from EDF Luminus for two projects in Belgium

- **“Katoen Natie” project located in Beveren, “Sibelco” in Dessel**
- **15-year service-contract included**

EDF Luminus, the second largest player in the Belgian energy market, has ordered wind turbines at Siemens Wind Power for two projects located in the Belgian municipalities of Dessel and Mol as well as in Beveren. The nine 3.2 megawatt (MW) machines of the Siemens D3 product platform will be installed at the wind projects “Sibelco” and “Katoen Natie – Loghiden City”. The customer, EDF Luminus, is mainly owned by Électricité de France (EDF) with a 63.5% stake. The wind energy order includes a service and maintenance agreement for a period of 15 years.

The two wind power plants have a combined generation capacity of 28.8 MW. The 19.2 MW Katoen Natie wind farm is located in the port of Antwerp on the territory of Beveren municipality. The 9.6 MW Sibelco wind farm is located in Dessel and Mol. Both projects will be equipped with the Siemens SWT-3.2-113 wind turbine with a rotor diameter of 113 meters and a rating of 3.2 megawatts. The nacelles of the Katoen Natie project will be mounted on towers with a hub height of 127.5m. For the Sibelco projects it is in and 99.5 meters. Turbine installation for both projects will start in October 2017.

“The new contract with EDF Luminus is an important achievement for us,” said Thomas Richterich, CEO Onshore, Siemens Wind Power. “That consolidates a long-term collaboration with EDF Luminus and strengthens our position in the Belgian market.”

**Siemens direct-drive technology for Belgium:**

EDF Luminus has ordered nine wind turbines of the type SWT-3.2-113 for two projects.

**Siemens Wind Power** is the separately managed wind business of Siemens AG. Siemens Wind Power is a leading supplier of reliable, environmentally-friendly and cost-efficient renewable energy solutions. Driving down the cost of wind power is our key target as we strive to make renewable energy fully competitive with conventional energy sources. Providing highly reliable and cost-efficient wind turbines, Siemens Wind Power offers solutions to meet both business and environmental needs. With over 35,000 megawatts of wind power installed, our wind power units deliver clean, renewable energy from offshore and onshore installations around the world. In fiscal 2016, which ended on September 30, 2016, Siemens Wind Power generated revenue of €5,976 billion and net income of €464 million and has around 14.500 employees worldwide.
